Final Informal Review Decision

March 23, 2017

Re: **Rising Hill**

Dear Mr. Cloutier:

Your facility requested an informal review of an audit report for **Rising Hill** dated December 20, 2016 for the fiscal period from January 1, 2014 through December 31, 2014 which resulted in your receipt of an overpayment of \$22,132.85. Your appeal request is based upon your letter dated February 17, 2017.

As a result of this request, we have prepared an informal review. Our **Final Informal Review Decision** is as follows:

Issue #1:

The Provider disagrees with audit adjustment #5 which adjusts the allowable routine & capital portions of software leases and equipment rental. The Provider requests that "computer software leases be categorized as fixed Capital Costs and that reimbursement of \$18,750.47 be allowed because (a) computer software leases are directly applicable and consistent with Principle 20.58(g); and (b) categorizing computer software leases as fixed Capital Costs is consistent with historical precedent."

Department's Response:

The Department agrees that it has historically allowed the allocation of software lease costs between the fixed and routine cost components. The Department will allow this treatment for the Provider's existing software lease costs. For leases that have previously had an allocation percentage accepted for reimbursement purposes, we will continue to recognize that allocation. For the acquisition of any new software not currently in use and leased, the Provider will be required to submit documentation to justify any allocation between the fixed and routine cost components.

The Department will issue a revised audit report to reflect this change.

This final informal review decision was based upon a consultation with the auditor of record, a review of her audit report and the related work papers, and your subsequent communications to us.

Please refer to the attached Notice of Appeal Rights of MaineCare Providers for an explanation of your facility's further appeal options.

Sincerely,
